PRECAST CONCRETE FENCE SYSTEMS
AMERICAN PRECAST CONCRETE

American Precast Concrete fences and walls are the premier choice for developers, government agencies, and landscaping architects desiring the rich, authentic look of masonry or wood for a fraction of the cost. Not only are our precast concrete fences more affordable than traditional fencing products, they offer unsurpassed versatility, durability, and maintenance-free longevity that ensures your fence will retain the functionality and visually-appealing aesthetics that are important to the life of your project.

Since 1985, American Precast Concrete has been using the most innovative concrete technologies and designs to deliver a quality product for a variety of applications. From commercial and residential development or revitalization, perimeter security and retaining walls, to visual screens and sound barriers, precast concrete fencing is a low-cost alternative that can be customized to create an attractive fence that blends with the surrounding community.

- Quick installation
- Affordable
- Attractive designs
- Rich, warm colors
- Realistic textures
- Minimal maintenance
- Insect resistance
- Resists weather damage
- Easy, low-cost repairs
- Reinforced with steel
- Customizable heights
- Withstands seismic activity
- Meets all safety codes
- Eco-friendly
FENCING AND WALL SOLUTIONS
PRECAST CONCRETE WALLS AND FENCES

A SOLUTION THAT MAKES SENSE
Precast concrete is revolutionizing the industry because of its durability and low cost. It installs quickly and can be adapted to any project. No matter how large or small the job site, American Precast Concrete can design a solution that enhances aesthetics, blends with the existing environment, provides functionality, and stays on budget. Don’t waste limited resources on traditional materials that require expensive maintenance and repairs due to damage or degradation.

Precast concrete saves money now and in the future. It requires virtually no upkeep and can withstand even the hardest abuse, making it an excellent choice for high-traffic areas, including congested freeways. If your precast concrete product does sustain damage, the impacted sections can be easily repaired for minimal cost without jeopardizing the integrity of the full structure.

Because precast concrete is not susceptible to infestation or rot, it will never need to be replaced, thereby reducing the impact on our natural resources. Additionally, since no stains or paints are needed, the release of harmful VOCs is eliminated. Choosing American Precast Concrete is good for the environment and good for your budget.
PRECAST CONCRETE FENCING, PERFECT FOR THESE AREAS AND MORE

PRIVACY FENCE
• Privacy of space and blocking unsightly views
• Coordinates with the aesthetics of the surrounding environment and architecture
• Advantages of outdoor living with privacy from neighbors and passing cars
• Withstands insect-infestation and harsh weather conditions
• Installation process is fast and simple

PUBLIC UTILITY WALL
• Our precast concrete walls and perimeter fences are made with the highest quality concrete, and are reinforced with ASTM A615, grade 60 rebar and galvanized steel meshing.
• Protects expensive and dangerous equipment
• Provides sound barriers for nearby residents
• Reduces security risks to public utilities
• Razor-Wire can be attached along the top for added security

SOUND WALLS
• Precast walls and fences are engineered with sound buffering technology
• Reduces noise and pollution
• Combines structural durability and visual appeal
• Used by municipalities, utility companies, residential and commercial developers.
• Never needing to repaint or stain
• Can be built 14 feet in height
INSTALLATION

Our precast concrete panels and posts can be installed on any type of landscape—hilly, flat, or in relatively tight quarters. Wall configurations conform to residential and commercial specifications and local building codes.

Standard systems are installed with posts set at 5 feet on-center; customizable options are available. All designs options are available in heights ranging from 1 to 14 feet.

Our fences use an interlocking system. The lower panel interlocks with the posts down its tracks and allows the additional panels to stack one on top of each other at one foot increments.

American Precast Concrete is an affordable option to many construction materials such as wood, vinyl, or stone masonry. American Precast wall systems involve less labor, less equipment, and are designed for easy installation, which equates to less cost.

American Precast is proud to introduce our new Stack Stone product line. This series replicates the look and feel of chiseled slate masonry, combining the inherent beauty of rock with the value-added benefits of precast concrete. Stone walls are available in customized color schemes and variable heights. From walkways to roadways, privacy, security, or sound-proofing, our stone wall series makes a perfect visual statement for residential, commercial, and public works projects of any size or function.

• Installing a trash enclosure will eliminate the unsightliness of trash bins
• Great for Shopping Centers, Business Parks, Apartment Complexes, Hotels, and Community centers
• Securing dumpsters from Vandalism, vagrants and animals
• Keeps developments cleaner, safer and more inviting to residents
SECURITY FENCE
Fencing and Wall Solutions
Precast Concrete Walls and Fences

When security is of the utmost importance, choose the strongest, toughest option available. Our Security series is made from a high-density concrete, and is the most solid, impenetrable product we offer. With the same clean look as our Large Brick pattern, this wall conforms to customized height requirements with panel lengths of either 5 or 8 feet. Panels are reinforced with Rebar running across to ensure strength and durability for this series of fencing. As with all our fences, anchors can be embedded into posts for running additional straight or coiled security wires along the top.
RANCH RAIL

- Virtually maintenance free
- Installed without mortar
- Steel and fiber reinforced
- Available in a 2-RAIL, 3-RAIL, or 4-RAIL system
- Custom designs available
- Termite and insect resistant
- Realistic textures

Our well built Rail Fencing systems are made from high density concrete and reinforced with steel and fiber mesh giving it the durability to withstand the harshest weather. These rails and posts will not distort, decay or splinter, saving you time, money and materials in both maintenance and replacement.
Concrete Ranch Rail Fencing is the solution for people who want all of the inherent benefits of concrete fencing with the traditional look and functionality of wood fencing. Our well built Rail Fencing systems are made from high density concrete and reinforced with steel and fiber mesh, giving it the durability to withstand the harshest weather, fires and termites. Our rails and posts will not distort, decay or splinter, saving you time, money and materials for both maintenance and replacement costs.

**DURABILITY**
All rails are reinforced with two #4 rebar tied, as well as fiber mesh. Our posts are reinforced with two #3 rebar tied. All materials have a strength of min. 4500 psi in 28 days.

**EASY TO INSTALL**
Installation of Split Rail Fence systems is quick and clean.
Our Timberline series offers the warmth of traditional wood without the upkeep. Since precast concrete fences are resistant to insects, rot, and weather, designers can integrate the richness of wood into any environment. HOAs prefer the limited maintenance cost and lasting beauty of Timberline.
America’s Rustic Brick pattern embodies the classic timelessness of hand-laid brickwork, but can be installed at a fraction of the time and cost. Whether you need high-functioning security or an attractive decorative feature wall, our Rustic Brick design delivers both strength and beauty.
SMOOTH FENCE
Smooth Fence provide the clean lines and contemporary details necessary to complement many architectural design styles. Yet, the rugged durability and weather-resistant quality of concrete make this fence ideal for enhanced perimeter security.

LARGE BRICK
Choose a wall that makes a statement. Our Large Brick pattern conveys the boldness of brick without the expense. Precast concrete fences are engineered to withstand extreme temperatures, ground movement, and erosion that destroy traditional masonry. When you choose precast concrete, you know your investment will last.
American Precast is proud to introduce our new Chisel Stone product line. This design replicates the look and feel of chiseled slate masonry, combining the inherent beauty of rock with the value-added benefits of precast concrete. Chisel stone is available in customized color schemes and varied heights. From walkways to roadways, for privacy, security, or sound-proofing, our chisel stone series makes a perfect visual statement for residential, commercial, and public works projects of any size or function. This fence can be installed in heights up to 8 feet and is set 5 feet on-center from post to post. The system is ideal for any type of fence or screening wall project.
We understand the importance of visual appeal to your design. That is why we’ve created a special one-step coloration system that infuses the concrete with the precise color specified. By utilizing a custom blending technique, we can achieve a variety of warm, rich tones that replicate the look, texture, and complexity of natural wood, brick, or organic stone.

These are just a few color examples available. Please contact us for other color options.
